Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

FINAL REJECTION

The objection and rejection under 35 USC 112, second paragraph, are claims 1 and 8-9 is withdrawn in view of the amendments to claim 1 and since claims 8-9 were canceled.

The rejection over Molnar et al (US 6,388,543) in view of Mouchavar et al (US 6,009,349) is withdrawn in view of the amendments to the claims..

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (c) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-2 are rejected under 35 USC 102 (e) as being anticipated by Wu et al (US 6,987,966).

Wu et al discloses in Figure 10 a polyphase filter comprising:

- at least two filters (116, 118, 138-142), each for filtering an input signal (VIIP, VIIN, VIQP, VIQN)) to produce a filtered signal at an output;
- at least two integrators(q4, q6); and

wherein the output of each integrator is coupled via an impedance element (86, 88, 90, 92) to an input of an adjacent integrator.

Response to Applicant's Arguments

Art Unit: 2816

The applicant's arguments over Molnar et al (US 6,388,543) and Mouchavar et al are persuasive without traverse.

Allowable Subject Matter

Claim 3-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

These claims are allowed because the prior art of record does not suggest "the impedance element is a capacitor".

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DINH T. LE whose telephone number is (571) 272-1745. The examiner can normally be reached on Monday-Friday (8AM-7PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, TIMOTHY CALLAHAN can be reached at (571) 272-1740.
